An ecosystem is a community of living organisms in conjunction with the nonliving components of their environment, interacting as a system. These biotic and abiotic components are linked together through

nutrient cycles and energy flows. Energy enters the system through photosynthesis and is incorporated into plant tissue.

Ecosystem - Wikipedia

Home page for AP students, prospective students and their families. The College Board's AP courses are college-level classes in a wide variety of subjects that you can take while still in high school.

Thermoelectric materials show the thermoelectric effect in a strong or convenient form. The thermoelectric effect refers to phenomena by which either a temperature difference creates an electric potential or an electric potential creates a temperature difference.

Thermoelectric materials - Wikipedia

An Introduction to Chemistry by Mark Bishop. There are two versions of this current textbook, both containing the same information but organized differently: the "Chemistry-first" version begins with actual "chemistry" — that is, chemical equations and reactions.

General Chemistry: Starting Points for Students

This site provides annotated Web links to instructional materials and other resources of interest to Chemistry teachers and course designers. The links are carefully selected to represent what this author considers to be the most useful and exemplary Web-accessible resources that others can draw upon for ideas and materials.
