Managing natural hazard risk in New Zealand – towards more resilient communities A think piece for local and central government and others with a role in managing natural hazards

Managing natural hazard risk in New Zealand – towards more

In the wake of a disaster, people often wonder if there is anything they can do to protect their family and property from the effects of such devastating losses. Hazard mitigation is the way to provide that protection. Mitigation means taking action now to reduce or prevent future damage later. There are three important elements to help reduce ...

Radon has no stable isotopes. Thirty-seven radioactive isotopes have been characterized, with atomic masses ranging from 193 to 229. The most stable isotope is ^{222}Rn , which is a decay product of ^{226}Ra , a decay product of ^{238}U . A trace amount of the (highly unstable) isotope ^{218}Rn is also among the daughters of ^{222}Rn .
