A numerical method is said to be convergent if the numerical solution approaches the exact solution as the step size  $h$  goes to 0. More precisely, we require that for every ODE (1) with a Lipschitz function  $f$  and every  $t^* > 0$ ,

We consider the problem of differentiating a function specified by noisy data. Regularizing the differentiation process avoids the noise amplification of finite-difference methods. We use total-variation regularization, which allows for discontinuous solutions. The resulting simple algorithm accurately differentiates noisy functions, including ...

REQUIREMENTS FOR A MAJOR IN MATHEMATICS. Mathematics is the study of quantity, structure and space. While mathematics is important in understanding and influencing the physical world around us, mathematics can also be curiosity-driven and enjoyed without the requirement of a particular application.
