WEIRD SCIENCE: torsion fields, spin-waves in the vacuum

Particles with spin can possess a magnetic dipole moment, just like a rotating electrically charged body in classical electrodynamics. These magnetic moments can be experimentally observed in several ways, e.g. by the deflection of particles by inhomogeneous magnetic fields in a Sternâ€“Gerlach experiment, or by measuring the magnetic fields ...

Spin-density wave (SDW) and charge-density wave (CDW) are names for two similar low-energy ordered states of solids. Both these states occur at low temperature in anisotropic, low-dimensional materials or in metals that have high densities of states at the Fermi level (). Other low-temperature ground states that occur in such materials are ...

The Zero-Dimensional Point Particle. Authors: Michael John Sarnowski Comments: 7 Pages. How does one get to zero dimension? In â€œThe Ultimate Answer to Life, the Universe, and Everything is an Entangled 42â€• we found that the universe could be spheres made out of spheres, made of spheres, down to a cuboctahedron with outer layer of 42 spheres.
